Work Experience

Galatic Events Corp. - Software Engineer

OCMS (July 2024 – Present)

- Develop and maintain web applications using Vue.js and Nuxt.js.
- Copy or create pages based on reference sites.
- Design the overall theme of a website.
- Fix bugs, implement new functionalities, and integrate APIs into the frontend.
- Ensure UI component quality and scalability using Storybook and Cypress.
- Leverage Quasar to enhance responsiveness and streamline development.

Tools & Frameworks:

Frontend: Vue.js, Nuxt.js, Quasar, Vuex, Storybook, Cypress
API Testing: Postman, Mokku
Version Control & Issue Tracking: Git, Bitbucket, JIRA
UI/UX Collaboration: Figma

LPS - Solutions Developer (React JS) *March 2022 – March 2024*

Mandays Calculator Project - Internal Project (Oct 2023 – March 2024)

- Worked on the user management module, setting up both backend and frontend.
- Translated mockup designs into high-quality code.
- Implemented success and error toast pop-ups upon submission.
- Integrated APIs for adding and editing users.
- Conducted Jest testing on user management components.
- Provided support for the Mandays Estimation/ODC Management module.

Tools & Frameworks:

Frontend: React.js, Formik, MUI, React Query, Jest, Redux
Backend: Spring Boot, Keycloak, MySQL Workbench, Java
Development & Project Management: Postman, Git, VS Code, Trello, Figma, IntelliJ

Hong Kong Provident Fund System (March 2022 – Nov 2023)

- Assigned to the investment module, translating mockup designs into high-quality code.
- Created reusable and scalable methods.
- Conducted Jest testing and fixed code smells and duplications identified by SonarQube.
- Integrated APIs from Swagger or those provided by the backend team.

Tools & Frameworks:

Frontend: React.js, Formik, MUI, React Query, Jest, Redux
Database & API Testing: Oracle SQL, Postman, Swagger
Development & CI/CD: VS Code, Bitbucket, Git, JIRA, SonarQube, Jenkins
