Professional Summary

Software Engineer with strong expertise using Vue.js and React.js, experienced in building responsive, user-friendly web applications. Proven ability to collaborate across teams, write scalable components, implement testing strategies, and integrate RESTful APIs. Currently expanding into full-stack development.

Technical Skills

Frontend: React.js, Vue.js, Angular, Nuxt.js, Next.js, Ionic, Quasar, Vuex, Redux, Pinia, Tailwind, Bootstrap, MUI, Element UI, Storybook, HTML5, CSS, SCSS, JavaScript, TypeScript
Backend & Database: MySQL, Oracle SQL, Java, PHP, Spring Boot, Firebase, Node.js, Express.js
Testing & Tools: Cypress, Jest, Postman, Mokku, Swagger, Git, Bitbucket, GitHub, JIRA, Jenkins, SonarQube, VS Code, IntelliJ, Figma, Trello, Vercel

Work Experience

Mid-Level Software Engineer - Flexicon Solution Inc.

July 2024 – July 2025

- Developed and maintained PAGCOR-authorized interactive gaming platforms using React, Vue, Nuxt.js, Node.js, Express.js, Tailwind CSS, Cypress, Jest and Storybook depending on project scope and requirements.
- Actively participated in Agile development processes, including sprint planning, daily stand-ups, backlog refinement, and retrospectives to ensure timely and iterative delivery of features.
- Built dynamic, pixel-perfect pages based on Figma mockups and reference sites.
- Used Git, Bitbucket, and JIRA for version control, task management, and issue tracking.

Front-End Developer - Lenovo PCCW Solutions (LPS)

March 2022 – March 2024

Mandays Calculator Project (Oct 2023 – Mar 2024)

- Set up front-end and back-end for the user management module using React.js, Redux, Spring Boot, and Keycloak.
- Translated Figma mockups into clean, functional UI using MUI, Formik, and React Query.
- Integrated APIs for user management and implemented toast notifications for success and error states.
- Performed unit testing on components using Jest.
- Supported the Mandays Estimation and ODC Management modules as needed.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, backlog refinement, and retrospectives to deliver iterative and high-quality features.

Hong Kong Provident Fund System (Mar 2022 – Nov 2023)

- Developed the investment module by converting mockup designs into high-quality, responsive React components.
- Conducted unit testing using Jest and ensured clean, maintainable code by resolving issues flagged by SonarQube.
- Created reusable and scalable components and state-driven logic using React.js, Redux, Formik, and MUI.
- Integrated REST APIs using Swagger; collaborated closely with backend teams for API adjustments.
- Worked within an Agile framework, contributing to sprint goals, user story estimations, and continuous delivery of incremental features.

Web Developer Intern - IFormatLogic

February 2021 – June 2021

- Developed web applications using Vue.js, React.js, PHP, MySQL, Laravel and Bootstrap for improved user experience.
- Integrated Vue.js front-end with Laravel APIs to support dynamic features.
- Assisted in debugging, code reviews, and optimizing application performance.

Education

Gordon College

2017 - 2021

Bachelor of Science in Information Technology

Olongapo City, Philippines

Capstone: R2Z Tracker created using Ionic Angular and PHP REST API Back End - Mobile App Developer (1 Year)

tools and frameworks: HTML, CSS, Typescript, Angular, Ionic, Bootstrap, PHP, Android Studio.

Projects

Portfolio

Built with React, TypeScript, and Tailwind CSS for a fast, responsive experience. React and TypeScript ensure scalability and maintainability, while Tailwind CSS enables clean, customizable styling.
