Professional Summary

Software Engineer with strong expertise using Vue.js and React.js, experienced in building responsive, user-friendly web applications. Proven ability to collaborate across teams, write scalable components, implement testing strategies, and integrate RESTful APIs. Currently expanding into full-stack development.

Work Experience

Mid-Level Software Engineer - Flexicon Solution Inc.

July 2024 – July 2025

- Developed and maintained a responsive web-based OCMS for administrators and operators using Vue, Nuxt, and Tailwind CSS.
- Built dynamic, pixel-perfect pages based on Figma mockups and reference sites.
- Created reusable UI components with Storybook, utilizing Quasar and Element UI for responsiveness and design consistency.
- Managed application state with Vuex and Pinia depending on project scope and requirements.
- Implemented end-to-end testing with Cypress to ensure functionality and reliability.
- Collaborated closely with designers, backend developers, and QA testers; validated REST APIs using Postman and Mokku.
- Used Git, Bitbucket, and JIRA for version control, task management, and issue tracking.

Front-End Developer - Lenovo PCCW Solutions (LPS)

March 2022 – March 2024

Mandays Calculator Project (Oct 2023 – Mar 2024)

- Set up front-end and back-end for the user management module using React.js, Spring Boot, and Keycloak.
- Translated Figma mockups into clean, functional UI using MUI, Formik, and React Query.
- Integrated APIs for user management and implemented toast notifications for success and error states.
- Performed unit testing on components using Jest.
- Supported the Mandays Estimation and ODC Management modules as needed.

Hong Kong Provident Fund System (Mar 2022 – Nov 2023)

- Developed the investment module by converting mockup designs into high-quality, responsive React components.
- Created reusable and scalable functions using React.js, Formik, and MUI.
- Integrated REST APIs using Swagger; collaborated closely with backend teams for API adjustments.
- Conducted unit testing using Jest and ensured clean, maintainable code by resolving issues flagged by SonarQube.

Web Developer Intern - IFormatLogic

February 2021 – June 2021

- Developed web applications using PHP, Laravel, and Vue.js for improved user experience.
- Integrated Vue.js front-end with Laravel APIs to support dynamic features.
- Assisted in debugging, code reviews, and optimizing application performance.

Technical Skills

Frontend: React.js, Vue.js, Angular, Nuxt.js, Next.js, Ionic, Quasar, Vuex, Redux, Pinia, Tailwind, Bootstrap, MUI, Element UI, Storybook, HTML5, CSS, SCSS, JavaScript, TypeScript

Backend & Database: MySQL, Oracle SQL, Java, PHP, Spring Boot, Firebase

Testing & Tools: Cypress, Jest, Postman, Mokku, Swagger, Git, Bitbucket, GitHub, JIRA, Jenkins, SonarQube, VS Code, IntelliJ, Figma, Trello, Vercel

Education

Gordon College

2017 - 2021

Bachelor of Science in Information Technology

Olongapo City, Philippines

Capstone: R2Z Tracker created using Ionic Angular and PHP REST API Back End - Mobile App Developer (1 Year)

tools and frameworks: HTML, CSS, Typescript, Angular, Ionic, Bootstrap, PHP, Android Studio.

Projects

Portfolio

Built with React, TypeScript, and Tailwind CSS for a fast, responsive experience. React and TypeScript ensure scalability and maintainability, while Tailwind CSS enables clean, customizable styling.
